

PATIENT PORTAL

Our patient portal is a website that allows you access to your child's chart through your cell phone, tablet, and/or computer. It gives you access to our medical staff during our clinic hours. As well, we can send you copies of immunization records, lab reports, medication instructions, and future appointments. Through our patient portal you can request appointments, as well as advice if you have a concern. (Though we do encourage you to call the office if you are requesting a same day appointment.) You can access your child's vital history and medication list. You can also verify your address and insurance information before appointments.

- No, I do not want to be signed up for the patient portal
- Yes, I want to be signed up for the patient portal

Email for the

invitation _____

My child's name & date of

birth _____

You must accept the invitation within 24 hours or it will expire. If it expires, please give us a call and we will resend the invitation.
